

-MDX 600- Firmware upgrade

Necessary material:

- MDX 600 with version 1.54 or later;
- USB 2.0 memory stick;
- Last firmware version for MDX 600;
- PC;

Previous steps:

- Download last firmware version available for your field strength meter. You can find at: <http://www.ankaro.com>
- Unzip the file downloaded from the web site. It contains:
 - app_S2_usb.bin

Upgrading:

1. Copy in the root directory of your USB 2.0 memory stick the file app_S2_usb.bin;
2. Switch on MDX. Access to "Setup" menu → "System" → and go to "Firmware upgrade" option, but **DON'T** confirm this option with "OK".

3. In this moment, insert USB 2.0 memory stick into the field strength meter. If it has been inserted correctly and detected by the MDX 600, next screen will appear:

USB 2.0 connector at MDX 600's lateral side

USB 2.0 detected by MDX 600

4. Confirm the "Firmware upgrade" option using "OK". Next screen will appear:

Select "start" and press "OK"

5. Once the upgrading has finished, the equipment will automatically re-boot. After this step, MDX 600 will have last firmware version installed.
